Fields common to project and dataset could be auto-completed, but with option to overwrite

Dataset options 1- selecting project

The screenshot shows a web application interface for creating a dataset. The top navigation bar includes 'My University', 'My Profile', and 'My Groups'. Below this is a toolbar with 'Browse' and 'Edit' tabs, and icons for 'Save', 'Cancel', 'Paste', 'Cut', 'Copy', 'Spelling', and 'Commit'. The main form has several fields: 'Title *', 'Project', 'Description', 'Categories', 'Storage Location', and 'Data Retention'. The 'Project' dropdown menu is open, showing a list of project names: '(None)', 'AHRC RTISAD', 'Cheese in Archaeology', 'RG Test Project 001', 'Southampton', 'Test 2', 'Test Project', 'Test Project 2', and 'Tests-drb'. The 'Southampton' option is highlighted. The 'Storage Location' field has radio buttons for 'Research Filestore' (selected) and 'Specify your own value:'. The 'Data Retention' field has radio buttons for 'Project End' (selected) and 'Specify your own value:'. A yellow callout box on the right contains the text: 'Project list would be specific to individual or SharePoint Group'.

Dataset option 2 – storage location
